Shuttle to release 802.11g wireless, case modding kits at CeBIT 2004

The company's XPC Accessories product line helps system integrators, OEMs and retailers deliver the XPC's users want while building sell through and customer loyalty

(Hannover, Germany — March 16, 2004) Shuttle Inc, a leading designer and manufacturer of small form factor (SFF) computers, accessories and motherboards, has announced the latest addition to the company's popular line of XPC Accessory peripherals and upgrade kits — the **PN15 Wireless LAN Module**. This fully IEEE802.11g standards compliant, user-installable kit makes setting up peer-to-peer and access point networks a snap.

"First launched at CeBIT 2003, Shuttle's accessories and upgrade kits offer a great way to add features to and get more out of your XPC," said Ken Huang, vice president, systems R&D. "The PN15 Wireless LAN Module for the XPC is a ready-to-integrate solution that delivers 54Mbps network connectivity virtually anywhere."

In addition to the PN15 Wireless LAN Module, Shuttle is also displaying the **PF31 "Dusk & Dawn" Case Modding Kit** at its CeBIT 2004 booth. Featuring NVIDIA's popular Dusk and Dawn characters, this kit is an easy and low-cost way for fans to add these ladies of "darkness and light" to their XPC's.

Shuttle encourages all interested industry professionals, buyers and media alike to visit its CeBIT 2004 booth (**Hannover Messe, Hall 22, Stand A26**). The company will be displaying its latest SFF, accessory and motherboard products and technologies.

Shuttle creates, others follow!
